Hi Nicole,

Could you talk at 11:30 on Wednesday? I think I can make that work. Thanks again, Tracey

Hi Tracey,

Unfortunately, Tuesday seems to have booked up. Would sometime between 9am and 1pm Wednesday work for you? Regarding the April meeting date, we'll coordinate internally here at EPA with the parties who will attend the meeting to identify which date works better, and get back to you. Thank you for providing those options.

Regards,

Nicole

Hi Nicole,

Thanks so much for the email. We would appreciate the opportunity to meet with you in the timeframe you mention. Would the first week in April work on your end? We are available April 4 or April 7. Please let me know.

As for touching base by phone next week, my schedule is completely clear on Tuesday. Would sometime Tuesday fit with your schedule?

Thanks and have a great weekend!

Best regards,

Tracey

**Subject:** FW: EPA crumb rubber study

Ms. Norberg,

My name is Nicole Villamizar, with the U.S. EPA's Office of Resource Conservation and Recovery. My office is supporting the outreach component of EPA's crumb rubber study, and we appreciate RMA's interest and thank you for reaching out to the Agency. I would like to arrange for a meeting between the RMA and EPA to occur sometime in late-March through mid-April, at our offices here in Washington, DC, on a date that is mutually agreeable. Ksenija Janjic and Chris Carusiello of my staff (cc'd on this email) would be pleased to work with you to identify a range of potential dates and times that could work for all parties. I would also like to give you a call early next week to talk about our approach and goals for the outreach effort generally. Thank you again for contacting us and if you're available early next week, please let me know what days and times would work well for you.

Sincerely,

Nicole Villamizar

**Subject:** EPA crumb rubber study

Hi Amy,

It was great to talk with you this morning. We are interested in learning more about EPA's recent announcement to further study synthetic turf. (See 2/12/16 announcement: <http://www.epa.gov/chemical-research/federal-research-action-plan-recycled-tire-crumb-used-playing-fields>).

The announcement specifies that the EPA, Centers for Disease control and Prevention/Agency for Toxic Substances and Disease Registry (ATSDR) and the Consumer Product Safety Commission (CPSC) are all working on the study. It would be helpful to know if EPA will be the lead agency in coordinating the study, which office(s) and staff at EPA are involved in the study, timing for release of further details on the study and plans for stakeholder engagement. It may not be known at this time, but we are also interested to know how EPA will coordinate with OEHHA in California and the study that OEHHA is undertaking on synthetic turf. We would like to reach out to the project lead, and any information you can provide would be really helpful.

We appreciate any details that you are able to provide at this time.

Best regards,

Tracey
